PREFACE

This report contains our analysis of the supply of scientists, mathematicians, and engineers in the United States through the year 2020. It consists of three volumes.

In Volume one, the main body of the report, we outline the issues associated with the national supply of these professionals, describe a methodology to project their future supply, and report our findings.

Volume two contains three appendices. Appendices A and B show the specific formulas and techniques used in our projection methodology. Appendix C provides detailed demographic data on scientists, mathematicians, and engineers who are civilian employees of DoD.

Volume three (Appendix D) is a set of tables that forms the basis of our projections and our analysis.

DTIC QUALITY INSPECTED 2

APPENDIX D

PROJECTIONS OF SCIENTIST, MATHEMATICIAN, AND ENGINEER SUPPLY

GENERAL

This appendix contains 18 tables that form the basis of our analysis. There are six tables for each of the low-, mid-, and high-range projections:

- Table D-1. Low-Range Total Supply Projections
- Table D-2. Low-Range Bachelor's Degrees Projections
- Table D-3. Low-Range Master's Degrees Projections
- Table D-4. Low-Range Foreign Bachelor's Degrees and Immigration
- Table D-5. Low-Range Foreign Master's Degrees Projections
- Table D-6. Low-Range Foreign Doctor's Degrees Projections
- Table D-7. Mid-Range Total Supply Projections
- Table D-8. Mid-Range Bachelor's Degrees Projections
- Table D-9. Mid-Range Master's Degrees Projections
- Table D-10. Mid-Range Foreign Bachelor's Degrees and Immigration
- Table D-11. Mid-Range Foreign Master's Degrees Projections
- Table D-12. Mid-Range Foreign Doctor's Degrees Projections
- Table D-13. High-Range Total Supply Projections
- Table D-14. High-Range Bachelor's Degrees Projections
- Table D-15. High-Range Master's Degrees Projections
- Table D-16. High-Range Foreign Bachelor's Degrees and Immigration
- Table D-17. High-Range Foreign Master's Degrees Projections
- Table D-18. High-Range Foreign Doctor's Degrees Projections.

RELATIONSHIP OF TABLES

Within each of the ranges, the total scientist, mathematician, and engineer (SME) projection is derived from the other five tables.

The projection begins with the base year 1988 inventory. Next, on a category-by-category and discipline-by-discipline basis, we add: the projected bachelor's

degrees, 25 percent of the projected master's degrees, the degrees earned by foreign students who are expected to remain in the United States (bachelor's, master's, and doctor's), and the expected net immigration (emigrants are subtracted), for 1989. Projected 1989 losses are also subtracted from the 1988 base year inventory. This process is repeated each year through 2020. For example, the projected 1989 inventory that results from the initial operation has 1990 additions and subtractions applied to it arrive at the 1990 projection of SME supply.
